

The 4-hole Ring Clamp - contents clearly arranged

All information at one glance

Visualisation simplified – in your company. Structure the most important contents clearly and improve the communication in your company. Besides its functionality the Ring Clamp captures with its modern design. Both in the office and in the production area: due to two different magnetic versions a surface-independent application is assured. The Ring Clamp, for example, sticks onto smooth surfaces due to the rubber-coated round magnets as well. Strong hold without slipping is guaranteed.

The Ring Clamp can be completed by the coloured File Divider Set which can be equipped on the front and on the back due to transparent pockets.

Process optimisation through easy communication

The 4-hole Ring Clamp embodies our holistic approach: We do not see ourselves as the producer of standardised products, but as a provider of solutions. So the Ring Clamp is the ideal instrument for all LEAN or Shop Floor solutions as it represents the most important contents clearly and structured. It perfectly fits into TQM as well. Process optimisation can be that simple!

Your advantages with the new 4-hole Ring Clamp

- The Ring Clamp appears in a new design. Process optimisation is a question of style.
- Through high quality processing, a long-lasting application is guaranteed.
- Optionally you can add an Index Label with individual lettering for quicker access.
- As its predecessor, the Ring Clamp is magnetic. Depending on the type of surface you can choose between the version with the two round magnets or the version with the magnetic stripe.
- By using the Ring Clamp the documents are organised with a capacity of 25 mm.
- The coloured File Divider Set offers the opportunity to structure contents thematically.
